**Following analysis shows that chance that one will be a victim of larceny/theft is 1%. Way to avoid this might be finding "safest" time of a day (or, in this case, night) or moving to safer district. Still, looks like there is no way to reduce risk to zero.**

Total number of crime incidents in San Francisco area during summer 2015 was as high as 28 993 occurences. Almost 33% of all crimes were larceny/theft, which makes it almost 3 times more often than other offences and non-criminal incidents.
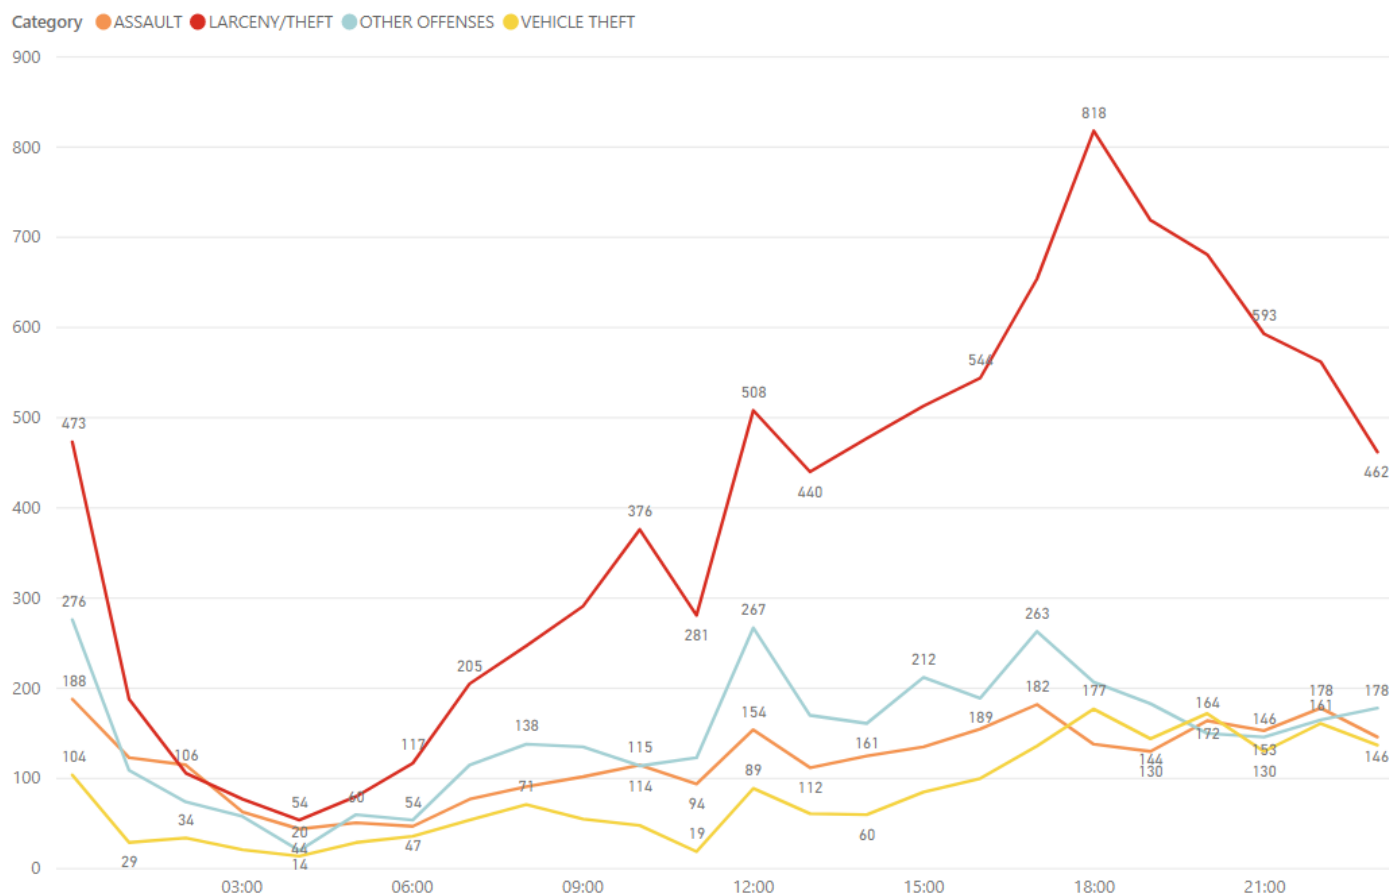

As per United States Census Bureau population of San Francisco was 866 320, so one person in 30 can be a subjects of criminal event. In other words, there is around 3% chance you can be a victim in SF and the highest probability is that you will suffer from theft. In total, your belonging can be taken from you with a probability of 1%!

Let's look at 5 most common crimes considering San Francisco districts. No matter size of district, the most common crime is the same as general trend for whole city. From the most common crimes, it makes from 28% of crimes up to 58%!

Let's check the most common threats for rightful citizen: larceny/theft, other offenses, assault and vehicle theft. Number of crimes follows the same trends during the day. Trend is the same for all crimes. The highest number of crimes occurs around 5pm and 6pm. Lowest number occurs at 4am.

What is more interesting, in time of a night which is characterized by lowest crime number, number of occurences of various crimes is similar for all of them, ranging from 14 for vehicle theft to 54 for larceny/theft. For "peak time", difference is much bigger – from 130 occurences of assault to 818 occurences of larceny/theft.

Category ● ASSAULT ● LARCENY/THEFT ● OTHER OFFENSES ● VEHICLE THEFT

Looks like if one wants to be safe, sleeping from 2am to 4am should be considered. It might not be possible, but moving to other district could help too. Southern can have almost 4 times more criminal events than Richmond!
